ENGINEERING GEOLOGY

Author Index Volume 54

Amri, R.M., see Al-Harthi, A.A.313
Al-Harthi, A.A., Al-Amri, R.M. and Shehata, W.M.
The porosity and engineering properties of vesicular basalt in Saudi Arabia313
Alonso, E.E., Vaunat, J. and Gens, A.
Modelling the mechanical behaviour of expansive clays 173

Baumann, J., see Foged, N. 129
Bell, F.G., Culshaw, M.G. and Cripps, J.C.
A review of selected engineering geological characteristics of English Chalk 237
Bjurström, H., see Sjöblom, R. 109
Bors, J., Dultz, S. and Riebe, B.
Retention of radionuclides by organophilic bentonite 195
Brown, R.C.
A multiple front propagation model for gas migration through clay 151

Carretero, M.I., see Galán, E. 287
Chen, J., see Shi, B.321
Cleall, P.J., see Thomas, H.R. 93
Cripps, J.C., see Bell, F.G. 237
Culshaw, M.G., see Bell, F.G. 237

Dultz, S., see Bors, J. 195

Eriksen, T.E., Jansson, M. and Molera, M.
Sorption effects on cation diffusion in compacted bentonite 231

Foged, N. and Baumann, J.
Clay membrane made of natural high plasticity clay: leachate migration due to advection and diffusion 129
Fukue, M., Minato, T., Horibe, H. and Taya, N.
The micro-structures of clay given by resistivity measurements 43

Galán, E., Carretero, M.I. and Mayoral, E.
A methodology for locating the original quarries used for constructing historical buildings: application to Malága Cathedral, Spain 287
Gens, A., see Alonso, E.E. 173
Gens, A., see Romero, E. 117
Grinrod, P.
Session III. Chemical aspects 185
Grindrod, P., Peletier, M. and Takase, H.
Mechanical interaction between swelling compacted clay and fractured rock, and the leaching of clay colloids 159
Grindrod, P., Takase, H. and Wood, G.P.
Modelling silicitation of a clay buffer subject to opposing temperature and hydration gradients 215

Harrington, J.F., see Horseman, S.T. 139
Herbert, H.-J. and Moog, H.C.
Cation exchange, interlayer spacing, and water content of MX-80 bentonite in high molar saline solutions 55
Horibe, H., see Fukue, M. 43
Horseman, S.T., Harrington, J.F. and Sellin, P.
Gas migration in clay barriers 139

Ichikawa, Y., Kawamura, K., Nakano, M., Kitayama, K. and Kawamura, H.
Unified molecular dynamics and homogenization analysis for bentonite behavior: current results and future possibilities 21
Ichikawa, Y., see Kawamura, K. 75
Inyang, H., see Shi, B. 321

Jansson, M., see Eriksen, T.E. 231

Kalbantner, P., see Sjöblom, R. 109
Kamei, G., Oda, C., Mitsui, S., Shibata, M. and Shinozaki, T.
Fe(II)–Na ion exchange at interlayers of smectite: adsorption–desorption experiments and a natural analogue 15
Kawamura, H., see Ichikawa, Y. 21
Kawamura, H., see Kawamura, K. 75
Kawamura, K., Ichikawa, Y., Nakano, M., Kitayama, K. and Kawamura, H.
Swelling properties of smectite up to 90C In situ X-ray diffraction experiments and molecular dynamic simulations 75
Kawamura, K., see Ichikawa, Y. 21
Kitayama, K., see Ichikawa, Y. 21
Kitayama, K., see Kawamura, K. 75
Kozaki, T., Sato, H., Sato, S. and Ohashi, H.
Diffusion mechanism of cesium ions in compacted montmorillonite 223

Lehikoinen, J., see Muurinen, A. 207
Liang, R.Y., Nusier, O.K. and Malkawi, A.H.

0013-7952/99/$ – see front matter © 1999 Elsevier Science B.V. All rights reserved.
PII: S0013-7952(99)00113-1

A reliability based approach for evaluating the slope stability of embankment dams 271
Lloret, A., see Romero, E. 117

Malkawi, A.H., see Liang, R.Y. 271
Mayoral, E., see Galán, E. 287
Mele, R., see Nunziata, C. 299
Minato, T., see Fukue, M. 43
Mitsui, S., see Kamei, G. 15
Molera, M., see Eriksen, T.E. 231
Moog, H.C., see Herbert, H.-J. 55
Murakami, Y., see Shi, B. 321
Muurinen, A. and Lehikoinen, J.
Porewater chemistry in compacted bentonite 207

Nakano, M., see Ichikawa, Y. 21
Nakano, M., see Kawamura, K. 75
Natale, M., see Nunziata, C. 299
Nunziata, C., Mele, R. and Natale, M.
Shear wave velocities and primary influencing factors of Campi Flegrei–Neapolitan deposits 299
Nusier, O.K., see Liang, R.Y. 271

Oda, C., see Kamei, G. 15
Ohashi, H., see Kozaki, T. 223

Peletier, M., see Grindrod, P. 159
Pusch, R.
Experience from preparation and investigation of clay microstructure 187
Pusch, R. and Schomburg, J.
Impact of microstructure on the hydraulic conductivity of undisturbed and artificially prepared smectitic clay 167
Pusch, R.
Microstructural evolution of buffers 33
Pusch, R.
Session II. Application od microstructural models 81
Pusch, R., see Sjöblom, R. 109

Riebe, B., see Bors, J. 195
Romero, E., Gens, A. and Lloret, A.
Water permeability, water retention and microstructure of unsaturated compacted Boom clay 117

Sato, H., see Kozaki, T. 223
Sato, S., see Kozaki, T. 223
Schomburg, J., see Pusch, R. 167
Sellin, P., see Horseman, S.T. 139
Shehata, W.M., see Al-Harthi, A.A. 313
Shi, B., Murakami, Y., Wu, Z., Chen, J. and Inyang, H.
Monitoring of internal failure evolution in soils using computerization X-ray tomography 321
Shibata, M., see Kamei, G. 15
Shinozaki, T., see Kamei, G. 15
Sjöblom, R., Kalbantner, P., Bjurström, H. and Pusch, R.
Application of the general microstructural model to erosion phenomena — mechanisms for the chemical–hydrodynamic conversion of bentonite to a pumpable slurry in conjunction with retrieval 109

Takase, H., see Gindrod, P. 159
Takase, H., see Grindrod, P. 215
Taya, N., see Fukue, M. 43
Thomas, H.R. and Cleall, P.J.
Inclusion of expansive clay behaviour in coupled thermo hydraulic mechanical models 93

Vaunat, J., see Alonso, E.E. 173
Villar, M.V.
Investigation of the behaviour of bentonite by means of suction-controlled oedometer tests 67

Wood, G.P., see Grindrod, P. 215
Wu, Z., see Shi, B. 321

Yong, R.N.
Overview of modeling of clay microstructure and interactions for prediction of waste isolation barrier performance 83
Yong, R.N.
Session I. Modeling of clay microstructure 1
Yong, R.N.
Soil suction and soil-water potentials in swelling clays in engineered clay barriers 3
